RE: Sun Cities CAP pipeline plan

Dear Commissioners:

It is most upsetting to me, a resident of Sun City West, to read that there will be another delay in approving the CAP pipeline which was to help decrease the pumping of groundwater in our area. This plan to use CAP water for irrigation has been before the commission for years and yet, there is still no decision. It is obvious to me that we must curtail pumping as soon as possible. Putting water into a recharge facility 7 miles away does not accomplish that end, nor is there any guarantee that the recharged water will replenish the Sun Cities aquifer any time soon. There is also the issue of subsidence which is threatening our community. Now I read that the ADWR is also in strong support of the pipeline option over any other. Why wait?

Please vote in favor of the pipeline plan as soon as possible, so that construction can begin before building the pipeline becomes even more expensive. Thank you.

Sincerely,

Fred R. Fuller

Subject: Groundwater Savings Project

Please be advised that as a homeowner in Sun City West, I fully support the groundwater savings project. Being a plumber for nearly 50 years, I know the value of water, it's source and it's quality. This project is the only way to go. I can't understand anyone objecting to it. Thank you.

Sincerely,
Francis M. Eron

Subject: CAP Water

To the Honorable Corporation Commissioners:

We are of the opinion that the CAP Water issue is very essential to the welfare of the Sun Cities. My husband and I are convinced that subsidence if allowed to continue could devastate our land value. We urge the Commission to support the Groundwater Savings Project.

Sincerely, George and Virginia McKeehan

Subject: Fw: water pipeline for the Sun Cities area

--Dear Commissioners:

The current drought that we are experiencing makes the need for a dependable water supply for the Sun Cities area necessary. I ask you to expedite the approval of the building of the pipeline rather than putting CAP water in the Aqua Fria recharge area. It is "penny wise and pound foolish" to save money by not building the pipeline; this will only hasten the subsidence of the land and vastly decrease the value of homes and businesses--or make them totally unsellable. As an engineer, I believe opponents of the pipeline have their science wrong and are looking at a solution that will not work. Each delay in the Commissions decision will increase the cost of any solution and will result in further depletion of ground water from the aquifer.

Yours sincerely,
Frank Cahill

Subject: Groundwater savings plan

My name is Stephanie Rogall. I live and vote in Sun City West. I think the groundwater savings plan is a necessity for those of us who plan to live here a long time. There are many important reasons to go to this plan, but stopping subsidence seems to be the most important. Please support groundwater savings. Thank you.

Subject: Cap Water

I want to let you know that we are in favor of using Cap Water for the watering of our golf courses. If we need a pipeline, then we need to build one. Maybe we could use R.G. Andersons severence package as a down payment.

Subject: Urgent need to reduce groundwater pumping

To: The Arizona Corporation Commission

My wife and I are long time home owners and residents in Sun City West, and are very concerned with the steady decline in the ground water level beneath the Sun Sun Cities.

We urgently request that the ACC approve the proposed Groundwater Savings

Project which will enable direct irrigating of the Sun Cities golf courses by CAP water instead of the present pumping of ground water for that purpose.

With all the reliable information we have been able to gather we feel that the situation has reached an alarming level and needs speedy corrective action.

Sincerely,
Mr.

& Mrs. George Herzog
